

SUMMARY

Results-driven Senior Test Analyst with 3.10 years of experience in automation testing using Selenium (Java) and UFT for logistics applications. Enhanced product quality by 17% through Agile methodologies and optimized processes, achieving 85% automation coverage. Skilled in API and stakeholder management, leveraging technologies like Java, SQL, and integrating CI/CD pipelines to reduce release cycles by 80%.

KEY SKILLS

• Java • Selenium • API • Postman • Appium • Salesforce • Git • Maven • Allure Reports • TestNG • BDD/TDD
Playwright • Agile • UFT • VB Script • Cucumber • BDD • ALM Octane

TECHNICAL SKILLS

- **UI Automation:** Selenium, Playwright, TestNG, Cucumber, Appium
- **API:** Postman, API Testing
- **Programming:** Java, VBScript, SQL
- **CI/CD & Version Control:** Git, Maven
- **Test Management:** JIRA ,ALM Octane, Agile

KEY DEVELOPMENT PROJECTS

- Designed and developed a scalable **Selenium Test Automation Framework** using **Java, TestNG, Page Object Model (POM), Page Factory, and Data-Driven Framework** concepts, improving framework reusability and regression stability by 70%.
- Performed **API Manual Testing** using Postman by validating REST APIs, request/response payloads, authentication mechanisms, status codes, headers, and business validations.
- Automated **300+ functional, smoke, regression, and end-to-end test scenarios** using Selenium WebDriver, TestNG, and Cucumber across multiple business-critical applications, achieving **85% automation coverage**.
- Integrated automation suites with **GitLab CI/CD pipelines**, enabling scheduled and trigger-based executions and reducing **release cycle time by 80%**.
- Automated approximately **100 functional test cases** using **OpenText UFT One**, reducing manual regression effort and improving test execution efficiency across desktop and web applications.
- Implemented **Extent Reports** and **Allure Reports** with screenshots, execution logs, and detailed failure analytics, improving stakeholder visibility and reducing debugging effort
- Performed **Cross-Browser Testing** across Chrome, Edge, and Firefox browsers, ensuring consistent application behavior across supported environments.
- Executed **functional, regression, sanity, and end-to-end test suites** across multiple environments, improving overall product quality and reducing production defects by **40%**.

PROFESSIONAL EXPERIENCE

SDET Dec '22 - Present
Capgemini Bangalore, IN

MBRDI (Mercedes-Benz Research And Development India) | Nov '25

- Developed and maintained **Salesforce UI automation scripts using Selenium (Java) and TestNG**, automating **100+ business flow test cases** across multiple Salesforce modules.
- Executed comprehensive Salesforce Automation analysis for the **MBCRM project**, focusing on Leads, Accounts, Opportunities, & Service Cloud modules using Salesforce to optimize customer relationship management processes
- Executed **API Manual Testing** using Postman by validating, authentication, request payloads, response payloads, HTTP status codes, and business rules.
- Elevated testing efficiency by automating API test scenarios using REST Assured, validating REST services, & seamlessly integrating API suites into **GitLab Continuous Integration/Continuous Deployment pipelines**, resulting in significant reductions in testing time
- Created reusable API validation utilities for JSON response verification, schema validation, authorization handling, and dynamic test data management.
- Enhanced application stability by conducting **functional, regression, smoke, & sanity testing for Salesforce Lightning releases** ,ensuring defect-free deployments & high-quality production releases
- Enhanced automation efficiency by 30% & reduced test execution time by 40% through the implementation of **automation scripts with Git for version control**, executing 100 test cases across multiple environments & supporting continuous integration & continuous deployment pipelines

- Managed **test cases, defects, and sprint activities using JIRA**, tracking **100+ defects** across releases.
- Collaborated with **developers, business analysts, and Salesforce admins** in an **Agile environment** to validate user stories and ensure quality deliverables.
- Analyzed **Salesforce objects, Lightning components, and dynamic elements** to build reliable and maintainable automation scripts

TGE(Jtollworks and Etollworks) | Dec '24 - Sep '25

- Validated web application functionality against business requirements by orchestrating automated test scripts & regression packs using **Selenium (Java), TestNG, & Cucumber (Behavior-Driven Development)**, significantly enhancing user experience & streamlining testing processes
- Orchestrated end-to-end automation & regression testing for web applications using Selenium, ensuring **consistent high-quality deliverables** & enhancing testing efficiency, which significantly improved release quality
- Engineered a scalable & maintainable automation framework utilizing the **Page Factory design pattern** across multiple projects, leveraging TestNG, Cucumber, & Selenium WebDriver to support comprehensive regression testing for all products
- Ensured application stability & reliability by conducting comprehensive system testing across testing, user acceptance testing, & production environments, enhancing stability by 20% & achieving **90% release readiness** utilizing JIRA, Selenium, & LoadRunner
- Drove product quality enhancement & minimized release delays by managing comprehensive test case creation & defect logging using **HP Application Lifecycle Management & JIRA**, resulting in a 30% reduction in defects, saving 500 hours of testing, & cutting release delays by 2 days
- Revamped automation scripts & regression pack execution using **Selenium & TestNG**, achieving enhanced maintainability & efficiency that significantly reduced test cycle time & elevated overall productivity

TGE(Tollworks) | Dec'22 - Nov '24

- Championed the development of comprehensive test cases using **VBScript within Unified Functional Testing**, significantly enhancing test coverage, reducing testing time by 30%, & facilitating early identification of critical defects
- Provided critical support for major releases, ensuring thorough testing and timely delivery Creating tools and **5+ applications** by producing clean & efficient code and supervising **code testing** & debugging
- Delivered automation solutions for P1, P2 and P3 test cases. Implemented health check
- Enhanced continuous monitoring & application stability by leveraging **Dynatrace**, achieving a 30% reduction in downtime & a 25% improvement in response time
- Elevated code efficiency & enhanced team collaboration by diligently updating Git repositories using **GitHub & GitLab**, resulting in increased project transparency
- Championed the setup & optimization of the Continuous Integration & Continuous Deployment pipeline within Git, concurrently managing multiple projects & integrating **automated testing at scale**, which reduced deployment time by 50% & significantly improved code quality & software delivery efficiency
- Elevated team productivity & reduced development time by 30% through enhancing software deployment processes utilizing **GitLab Continuous Integration & Jenkins Continuous Deployment**, significantly boosting software quality ratings

EDUCATION

Bachelor of Technology

Dec '19 - Nov '22

Raghu institute of Technology

IN

- Secured 85%

CERTIFICATIONS

- **Microsoft Azure Fundamentals (AZ 900)**
- **Selenium with java, cucumber**
- **Micro Focus UFT**
- **Generative AI tools & Agents**
